OPPORTUNITIES / NEW AND EXCITING CHALLENGES

HALIFAX,
NOVA SCOTIA

JUNIOR SOFTWARE DEVELOPER

SEEKING JUNIOR SOFTWARE DEVELOPER IN HALIFAX, NOVA SCOTIA

POSITION RESPONSIBILITIES

- Participate in requirements analysis & design discussion with end users & other development staff.
- Assist in estimation of project milestones, as well as individual features, bug fixes, and other code changes.
- Assist in high-level and low-level design of features, bug fixes, and other code changes.
- Work independently on features, bug fixes, and other code changes using Java, Spring, Javascript, JQuery, CSS, SQL, and related technologies.
- Use the JUnit testing framework to create automated tests to help verify the correctness of code.
- Manually test work and use the Eclipse debugger to troubleshoot problems.
- Work with development team in design and implementation of distributed systems.
- Document code at an appropriate level of detail and write clean, maintainable code.
- Proactively communicate with your supervisor to ensure work progresses efficiently and effectively.

REQUIREMENTS & QUALIFICATIONS

- 1 to 3 years of software development experience.
- Experience with the Java programming language.
- Experience with SQL.
- Ability to work with a team and self-manage in order to serve our clients.
- Able to learn on the fly and take new challenges head-on.
- Demonstrate a positive attitude to promote a healthy work environment.
- Great interpersonal and customer service skills.
- Enjoy working in a fast-paced team environment.
- Ability to work with end users of all skill levels.
- Good analytical, problem solving, and organizational skills.
- Experience with Javascript, and JQuery in particular, is an asset.
- Experience with the Spring web application framework, or another MVC framework, is an asset.
- Experience with PostgreSQL is an asset.
- A degree in software engineering, computer science or equivalent education and experience.
